How can I do this using css? A: Here is the code I used to make a circle. If you want to modify the border and shadow properties you can do that right after

creating it. You can use the code below to create that circle: Here is the CSS used to make the circle: .circle{ width:50px; height:50px; border-radius: 100%; background-color: #eee; display: inline-block; box-shadow: 0 1px 1px rgba(0,0,0,.2), inset 0 1px 0 rgba(255,255,255,.4); text-align:center; border-bottom-left-radius: 50%; b

order-bottom-right-radius: 50%; border-top-right-radius: 50%; border-top-left-radius: 50%; } .circle-bg{ background-image: radial-gradient(circle at 50% 100%, transparent 0%, transparent 50%, #fff 50%); } .circle-shadow{ z-index:999; height:50px; width:50px; position: absolute; background-color: #555555; border-bottom-left-radius: 50%; b

order-bottom-right-radius: 50%; border-top-right-radius: 50%; border-top-left-radius: 50%; } You can add any CSS you like after the classes. This works for me. Any questions, feel free to ask! 1cdb36666d
